## ROAD WORK NOTICE

The following streets are planned to receive a "Fog Seal" pavement treatment. This work will occur on or about September 23 & 24<sup>th</sup>, will be weather dependent, and will occur on the following streets:

Yerxa Road  
Joyce Road  
Ivy Circle  
Kimball Road

Davis Avenue  
Draper Avenue  
Fairview Avenue

The fog seal is a spray application of a diluted asphalt emulsion applied to the existing road surface to seal, protect and extend the life of the road surface. The fog seal will provide a "sealing treatment" that will reduce weathering and resist oxidation of the road surface. This added protection will help resist aging and extend the life of the road.

The application will be applied by a spray truck on one side of the roadway. A police detail will be present and will allow access to abutters. Abutters may cross the treated surface and travel on the untreated side of the street. After a short duration of 30-60 minutes the process will be repeated on the opposite of the street and traffic will flip-flop as directed by the Police Department.

Please avoid the work areas as possible and use caution if traveling in or near the work areas is necessary.
